Together, we can get the job done under pressure all day, every day.

Supermarket customers who use Sporlan CO_2 flow control products and Micro Thermo Technologies controls are assured their refrigeration systems operate reliably and efficiently while being constantly monitored by state of the art digital controls. High pressure CO_2 systems need heavy duty, ultra reliable components that are dependable, trouble free with economical life-cycle costs and the lowest possible carbon footprint. Facility and maintenance engineers in-the-know prefer Sporlan and Micro Thermo Technologies. Have the confidence that your CO_2 refrigeration requirements are covered with systems, spare parts and integrated facilities management tools from companies whose reputations have been built on quiet success.
