

Together, we can go from simple to solutions.

Parker delivers customized subsystems, kits, manifolds, and leak-free value added assemblies – solutions that streamline the production process, reduce braze joints, increase line rates, reduce SKUs, reduce component inventory – and simply save you money.

In one application, Parker initiated \$1.5 million dollars of productivity improvements for a single customer, while another, we freed 200K worth of capital, and increased throughput by 100%.

It's simple, let Parker produce cost savings solutions for you.

From our customer...

“Partnering with Parker Hannifin as a valued supplier has been a huge asset to the growth and strength of our company.”

Dr. Duane A. Hallowell, President / CEO Hallowell International

“From early development, through commercialization periods, into full production, Hallowell International chose Parker Hannifin components for our systems because they are durable, reliable and sheer quality. Partnering with Parker Hannifin as a valued supplier has been a huge asset to the growth and strength of our company. Not only have their products, services and value add assemblies allowed for us to manufacture higher quality systems with increased production efficiency, but their expertise and innovative ways of thinking have paved the way into rapidly developing our business model and build up of our infrastructure.

Parker Hannifin’s commitment to engineering, best practices and attention to detail make them the ideal and best supplier in the HVAC industry. Their assistance to furthering our true growth potential is apparent with continued support for engineering and production services. Parker has the best, most reliable, and most recognized HVAC components in the world – we owe the highest quality and most trusted brands to our dealers. Parker is the obvious choice for success.”

Parker has helped customers like Hallowell realize millions of dollars worth of savings through value stream mapping and value added assemblies. We are helping customers implement initiatives that target areas of improvement throughout their production process.

Helping customers realize the following benefits:

- increased production line rates
- reduced SKUs and inventory
- freed floor space
- reduced warranty costs
- eliminated scrap and reduce leak rates
- reduced Rejected Parts Per Million – for one customer by 70%
