

MTSL-1011
July 3, 2014

TO: MT SALES DISTRIBUTION

SUBJECT: U700 LAUNCH

We are pleased to announce the first product launch on the new MT-700 Series hardware platform. The new U700 Monitoring Node will be available July 11, 2014.

The U700 will replace the existing U500 Sensor Node. In the coming months, we will offer both the U700 and U500, as we reduce inventory. Once the final phase-out schedule has been set, another sales letter will be issued with further details.

Accompanying the new controller, we will also be releasing an update to the MT Alliance™ software. Version 7.2.2 will be required to support the U700.

The new product cut sheet for the U700 is attached. We are currently finalizing the remaining literature and launch package for the U700. I will be sending these items out in the coming days.

Regards,

Eric Rist
Assistant Product Manager – RAC Electronics
Parker Hannifin – Instrumentation Group
