

MTSL-1008  
February 13, 2014

**TO: MT SALES DISTRIBUTION**

**SUBJECT: ALLIANCE VERSION 7.2.1 RELEASE**

Micro Thermo Technologies is pleased to announce the latest release of the MT Alliance Software Suite. The new version, version 7.2.1, marks an important milestone in the ongoing development of the Micro Thermo Controls Platform.

Alliance 7.2.1 is the first release to include support for the new MT-700 series controllers, launching later this year. Other upgrades available in this version include:

- The Case Controller now supports the Sporlan Secondary Fluid Valve (SFV), including an advanced control algorithm that optimizes system balance and efficiency.
- Improved ergonomics in the user interface, including new product images to help guide the user during installation.
- Improved Delayed Install feature, minor bug fixes, and much more.

Additional details of the update are included in the attached internal release announcement.

**PLEASE NOTE:** the attached document is for your reference and can be used to create additional communication to your customers – but should not to be sent to individuals outside of Parker.

Regards,

Eric Rist  
Assistant Product Manager – RAC Electronics
