May 16, 2014

**TO: MT SALES DISTRIBUTION**

**SUBJECT: Data Logger**

Following testing, we are now finalizing the transition to the new Micro Thermo Technologies™ Alliance Data Logger. The new industrial PC has different dimensions and exterior color, and features upgraded hardware components compared the previous generation.

We have created a new product sheet for the Data Logger, including key features and detailed hardware specifications. The form will be posted on the Micro Thermo Product page of SporlanOnline early next week. In the meantime, a copy has been included as an attachment.

Regards,

Eric Rist  
Assistant Product Manager – RAC Electronics
