Catch-All®

SPORLAN TM

NEW and IMPROVED molded porous core delivers even better filtration capacity while providing exceptional water and acid capacity

Robust molded core eliminates the possibility of desiccant breakdown

Leaf-spring holds core firmly in place and provides shockproof assembly for rugged handling

Corrosion resistant epoxy coating

Compatible with HCFC, HFC and the new HFO/R32 blend refrigerants

Polyester pad seals core to shell wall to prevent refrigerant bypassing core, provides added filtration

Copper fittings

HFO Refrigerant Compliant

At a glance, filter-driers look similar. But it's what's inside that counts...specifically the core. Only Sporlan has pioneered and perfected the molded porous core design. Over 60 years of research and experience go into every Catch-All core.

The Catch-All's molded core provides the ultimate combination of water and acid capacities, offers excellent filtration, and eliminates the possibility of desiccant attrition. And, the complete line-up of Catch-Alls are rated for the increased pressure requirements of R-410A.
